

# **Education Plan of Undergraduate Program in Finance (International Students)**

## **I. Program, Program Code, Field**

Program: Finance

Program Code: 020301K

Field: Economics

## **II. Objective**

This program integrates the essential skills required in finance sector and skills of Chinese speaking and writing into one complete program of study. The integration of these important skills helps our students to build sound grounding in economic and finance and become internationally competitive talents.

## **III. Program**

This program aims to achieve integration among subjects. Our university is renowned for its education in economics, management and law. Students are expected to be professional in various subjects related to finance. This program addresses the value of cross-cultural study by facilitating access to Chinese market and culture. This program provides training in both academic analyses and practice skills, encourages both rigid research and innovative thinking.

We expect our graduates to reach the following goals:

1. Have a sound academic grounding and advanced knowledge structure in finance.
2. Be familiar with the basics in subjects related to finance, such as economics, management and law.
3. Know how to do quantitative analysis in social science and have a basic understanding in frontier research in finance
4. Master skills of Chinese listening, speaking, reading and writing, as well as computer skills.

## **IV. Program length**

This is a 4-year program. Students on average can take 3-6 years to complete.

## **V. Graduation requirement and degree**

Graduation requirement: Complete all required credits.

Degree conferred to graduates: Bachelor Degree in Economics

## VI. Program goal and method

Goal (detailed standard for knowledge, skills and abilities)		Method		
		Courses	Practices	Others
1. Communication and Presentation Skills	1.1 Communication	Chinese listening and speaking		
	1.2 Presentation	Chinese reading and writing		
2. Wide Scope, Sound Grounding, and High Proficiency	2.1 Wide Scope	General Theory of Law and Management		
	2.2 Sound Grounding	Micro- and Macroeconomics		
	2.3 High Proficiency	Financial Markets et al		Lectures
3. Abilities of problem solving and practices	3.1 Problem solving	Experimental classes		
	3.2 Practices		Internship	
4. Chinese culture	4.1 Know Chinese culture	Chinese culture et al		
5. International vision	5.1 International Standard	Frontier Research in Finance		Lectures

## VII. Curriculum
